

03 Food safety and nutrition procedures

03.1 Food preparation, storage and purchase

General

- All staff have up to date certificated training on food safety.
- Staff refer to Eat Better, Start Better (Action for Children 2017) and Example menus for early years settings in England (PHE 2017) which contains guidance on menu planning, food safety, managing food allergies and reading food labels.
- The Pre-school Lead is responsible for ensuring that the requirements in Safer Food Better Business are implemented.
- All staff responsible for preparing food have undertaken the Food Allergy Online Training CPD module available at <http://allergytraining.food.gov.uk/>.
- The Pre-school Lead is responsible for overseeing the work of all food handlers to ensure hygiene and allergy procedures are complied with.
- The Pre-school Lead has responsibility for conducting risk assessment based on the 'Hazard Analysis and Critical Control Point' method set out in Safer Food Better Business.
- The Pre-school Lead maintains a Food Allergy and Dietary Needs poster with:
 - a list of all children with known food allergies or dietary needs updated at least once a term (the personal/medical details about the allergy or dietary needs remain in the child's file along with a copy of the risk assessment). This is clearly displayed for all staff and the risk assessment shared with all staff.
 - a record of food menus along with any allergens using
 - a copy of the FSA booklet 'Allergen information for loose foods' available at www.food.gov.uk/sites/default/files/media/document/loosefoodsleaflet.pdf
 - a copy of the Food Allergy Online Training CPD certificate for each member of staff that has undertaken the training
- The Pre-school Lead is responsible for informing the Management Committee and then reports to Ofsted any food poisoning affecting two or more children looked after on the premises. Notification must be made as soon as possible and within 14 days of the incident.

Purchasing and storing food

- Food is purchased from reputable suppliers.
- Parents are requested not to bring food that contains nuts. Staff check packets to make sure they do not contain nuts or nut products.
- Bulk buy is avoided where food may go out of date before use.

- All opened dried food stuffs are stored in airtight containers.
- Dried packaged food is not decanted from packaging into large bins or containers as this prevents monitoring of sell by/use by dates and allergen information.
- Food is regularly checked for sell by/use by dates and any expired items are discarded.
- Bottles and jars are cleaned before returning to the cupboards.
- Items are not stored on the floor; floors are kept clear so they can be easily swept.
- Perishable foods such as dairy produce, meat and fish are to be used the next/same day. Soft fruit and easily perishable vegetables are kept in the fridge at 1- 5 Celsius.
- Freezer containers should be labelled, dated and used within 1-3 months.
- Fridge and freezer thermometers should be in place. Recommended temperatures for fridge 37 degrees Fahrenheit (3 degrees Celsius), and freezers 0 degrees Fahrenheit (-18 degrees Celsius). Temperatures must be checked and recorded daily to ensure correct temperatures are being maintained.
- Freezers are defrosted every 3 months or according to the manufacturer's instructions.
- Meat/fish is stored on lower shelves and in drip-free dishes.
- Fruit and vegetables stored in the fridge are washed thoroughly before refrigeration to reduce risk of pests and E.coli contamination.
- Staff's own food or drink should be kept in separate designated area of the fridge; where possible, a fridge should be kept in the staff room to avoid mix ups.
- Items in fridges must be regularly checked to ensure they are not past use by dates.

Preparation of food

- Food handlers must check the content of food/packets to ensure they do not contain allergens.
- Food allergens must be identified on the notice board and displayed for parents.
- Food handlers wash hands and cover any cuts or abrasions before handling food.
- Separate boards and knives are used for chopping food.
- All vegetables and fruit are washed before preparing.
- Food left out is covered.
- A separate toaster is kept and used for children with a wheat or gluten allergy.
- Food prepared for children with dietary needs and preferences is clearly labelled and every effort is made to prevent cross-contamination.
- Raw eggs are not to be given in any form, such as mousse or mayonnaise.

Serving Food

- Food is served in front of children, children are encouraged to choose from three foods, and to use cutlery appropriately.
- Staff risk assess the likelihood of children with dietary restrictions accessing the food of other children and must take appropriate action to prevent this from happening, for example:
 - check the list of children's dietary requirements displayed in the food preparation area
 - other methods as agreed by the Pre-school Lead
- Children with allergies/food preferences are not made to feel 'singled out' by the methods used to manage their allergy/food preference.
- Food served to children with identified allergies is checked to ensure that it does not contain any of the allergens for that child.
- Tables are cleaned before and after, with a suitable antibacterial cleaner.
- Members of staff serving food wash their hands and cover any cuts with a blue plaster.

E.coli prevention

Staff who are preparing and handling food, especially food that is not pre-prepared for consumption e.g. fruit and vegetables grown on the premises, must be aware of the potential spread of E.coli and must clean and store food in accordance with the E.coli 0157 guidance, available at:

www.food.gov.uk/business-industry/guidancenotes/hygguid/ecoliguide#.U7FCVGIOWdl
